Introduction

Talks & Walks helps schools teach about British nature, heritage and conservation by getting into the great outdoors.

Our sessions are designed to help you teach curriculum topics and give your students a fun, hands-on and educational experience. We are also completely covered by insurance and a full CRB check.

Our School Talks

No matter what type of school you are, we offer sessions that use your grounds and resources to maximum potential.

Whether you are interested in attracting wildlife into your playground or information on Britain's rarer species, we believe the best place to learn is outside.

Barn Swallow

Who teaches the sessions?

Our sessions are taught by Russell Hedley, who set up Talks & Walks to share his passion for all things nature.

His aim is to help teachers develop and deliver wildlife educational sessions that will capture the imagination of pupils of all ages.

Using knowledge and experience he hopes to:

- Raise awareness of key conservation issues.
- Encourage students to spend more time outdoors.
- Assist teaching curriculum subjects outside, wherever possible.
- Give all students equal chance to contribute to sessions and increase their confidence in their own abilities.

Conservation with Learning

Schools have enormous potential to become beacons for local wildlife. Making your grounds attractive to British species is easy, cost effective and great fun to set up.

The wildlife will benefit from your contribution and your students will benefit with greater understanding and respect for the world around them.

Nature's Benefits

It is generally recognised that teaching children in an outside environment is beneficial to their inquisitiveness and learning ability. By teaching subjects practically as well as theoretically, children will remember and learn more through association.

Learning alongside nature also helps shy students come forward and build up their confidence. This aids them in their development and further education.

Sessions

We have a number of educational sessions available including:

- Wildlife in your Garden
- British Habitats and Wildlife
- Conservation in Britain
- The Coast of Britain
- Down on the Farm
- Waterways of Britain
- Invasive Species
- Prehistoric Britain
- Unique tailor made sessions ..and many more!

Visit our website for more information.
